INTRODUCTION

Over the course of millennia, what began as a world of fantasy and myth advances beyond its ages of primitivity, agriculture, conquest, exploration, and industry. It is now an age of technology. Life transpires on the spectrum of science and sorcery. It is a world where the gods of the machine coexist with the gods of the natural world. Welcome to Terra Machina.

Terra Machina is a tabletop RPG based that takes inspiration from Japanese roleplaying video games of the 32-bit console era. It imagines a fantasy world where time has passed to the point where technology is just as powerful as magic. It is meant to be a unique experience that combines the best elements of fantasy, science fiction, and action.

This rulebook is written with the intended audience being the Game Master (GM for short), but it would also be good for players as well. My recommendation is to read through once and then use it as a reference when planning your next session or one-shot.

MATERIALS

To play the game, each player will need to grab the following:

- A copy of the Basic Character Sheet
- A Class Crystal that the player will use as their base class (it must be a class that does not have any listed prerequisites)
- A pencil
- A set of polyhedral dice
 - 20-sided die (d20)
 - 12-sided die (d12)
 - 10-sided die (d10)
 - 8-sided die (d8)
 - 6-sided die (d6)
 - 4-sided die (d4)

RULES

SKILLS

Rolling skills are how the player will determine if the actions a character takes in or out of combat will succeed. There are 12 basic skills (3 for each stat) that a player may roll depending on the character's actions. We will delve further into this in a little bit.

Unless otherwise indicated, a skill consists of a roll of a d20 + a basic skill and will have the following results:

18 or more	Success
10 to 17	Minor Success (which means, you only partially succeed, or you fully succeed but there are consequences; in combat, this usually means a counterattack)
9 or less	Fail (but the character gains 1 XP)

Each class also has its own set of skills unique to that class. Each class has unique starting skill but also ones that they gain by gaining experience. There are also some skills that have an advanced level to them (denoted by being indented on the sheet) that can only be obtained after gaining the first skill.

There are also *custom skills*. A custom skill is a skill that gets created by the GM or by a player with the approval of the GM based on a critical event in the story, such as defeating an important villain or finding a magical artifact. There is a section on the basic character sheet where the player may write the character's custom skills. Examples of custom skills include:

Epic Roll in a specific situation
Increasing the damage die for a particular weapon
A special attack that can be used in specific circumstances

At the end of this guide, there are some sample custom skills that can be used as a reference.

Certain skills will require the use of a limited pool of points called Spirit Points (SP). Note that if a skill requires SP, the SP is expended regardless of whether the roll is successful or not.

The most important rule on skills is that the GM determines what skills are applicable in the situation and whether the action is even possible. In general, Terra Machina is meant to be extremely freeform and forgiving, where anything is possible. However, the GM may impose limits so that the world makes sense.

GRACE BASIC SKILLS

DIPLOMACY

Diplomacy is how well a character interacts with others. Common uses:

- Recruit an NPC into the party.
- Convince an NPC to do something.
- Lying
- Negotiate a cheaper price on an item to buy.
- Negotiate more money for an item to sell.
- Determine if someone talking to you is lying.

MOVEMENT

Movement determines how well the character can move their body. Common uses:

- Combat order.
- Run fast.
- Sneak around.
- Dodge or avoid danger.
- Leap long distance.
- Climbing a steep hill.

SHOOT

Shoot determines a character's aim. Common uses:

- Throwing an object to hit something.
- Throwing an object for an ally to catch.
- Throwing an object to distract an enemy.
- Shooting a firearm or throwing something in combat.

INTELLECT BASIC SKILLS

DEDUCTION

Deduction determines how good a character is at figuring things out. Common uses:

- Figuring out a puzzle.
- Finding a weak spot in a building.
- Figuring out how old something is.
- Figuring an enemy's weakness.

KNOWLEDGE

Knowledge is what the character knows and can recall. Common uses:

- History of a place you're visiting.
- Politics of a place you're visiting.
- Common knowledge about what's happening.

TINKER

Knowledge is what the character knows and can recall. Common uses:

- Fix something.
- Build something.
- Operate a vehicle.
- Hack computers.

MIGHT BASIC SKILLS

BRAWN

Brawn is how strong the character is. Common uses:

- Lifting an object.
- Breaking an object.
- Knocking down a door.

MELEE

Melee is how well the character can handle close combat. Common uses:

- Close-quarter combat.
- Sucker-punching someone.
- Wrestling competition.

RESILIENCE

Resilience is how physically tough the character is. Common uses:

- Withstanding damage from falling.
- Blocking an object that's going to hit you.
- Overcoming certain statuses.

SPIRIT BASIC SKILLS

WILLPOWER

Willpower governs how mentally tough the character is. Common uses:

- Overcoming certain statuses.
- If knocked out, whether they will survive.

AURA

Aura is how in-tune the character is with the natural and supernatural world. Common uses:

- Spellcasting.
- Taming animals.

SENSE

Sense is how adept the character is at sensing what is around them and finding things.
Common uses:

- Is there any danger?
- Looking for treasure.
- Looking for secret pathways.

ROLLING THE DICE

We discussed in the Skills sections how dice rolls are divided into Success, Minor Success, and Fail rolls. However there are some special circumstances that need to be discussed.

EPIC ROLL

If a skill or circumstance requires an Epic Roll, the player will roll 2 d20 dice and take the better result.

TRAGIC ROLL

If a status or circumstance requires a Tragic Roll, the player will roll 2 d20 dice and take the worse result.

TRAGIC VS. EPIC ROLLS

If the situation calls for both a Tragic Roll and an Epic Roll, the player will just roll 1 die. They cancel each other out. If, for some reason, the situation calls for doubling a Tragic or Epic Roll, then the player will just roll 2 dice (or the same one twice). They do not stack. There will not be a situation where the player should be rolling more than 2 dice or the same die twice.

BREAKTHROUGH

If the player rolls a 20 on the die, regardless of any modifiers, it is considered an automatic success and it's called a Breakthrough. If the player rolls a Breakthrough Roll, you must give the player a special reward.

For example, if the character was attempting a Melee or Shoot to attack an enemy, maybe they instantly kill it. If the character was attempting a Sense roll, maybe give them some hidden treasure.

The easiest and most common thing to do is assign the character a custom skill that relates to the roll they just performed. For example, if the player got a 20 on a roll+Movement to hide from bandits, you could give them the custom move "Among the Shadows: Epic Roll for Movement when hiding from bandits."

CATASTROPHE

If the player rolls a 1 on the die, regardless of any modifiers, it is considered an automatic fail. If the player rolls this type of catastrophic roll, the GM must give them a consequence for their failure.

For example, if the character is attacking maybe their weapon breaks. Or, if they are attempting to repair something, it explodes and causes damage.

TRAVERSAL

As a GM, your primary goal is to build a universe (or multiverse if that's what interests you) that your players can explore and have fun.

AREAS

Characters travel in terms of areas. An area is generally described as a location that's distinct and encompasses the entire line of sight of the characters, though there can be some hidden sections.

Areas of the game are designated as either dangerous or safe. Dangerous areas are those where combat is intended to take place or where a danger is imminent. That doesn't mean that the characters cannot be harmed in a safe area. It just means that the general intention of that area is not intended to be for combat or peril.

SCENARIOS

A scenario is the collection of areas that are available to the player characters to traverse to complete a task that they set out to accomplish. It is comprised of a set of areas, a singular goal, and an ultimate challenge, usually in the form of a powerful enemy. A scenario is usually the length of a single session but can span up to three sessions depending on the characters' decisions and session lengths.

CAMPAIGNS

A campaign in Terra Machina is the entire saga that a set of player characters go through until they complete or fail their goal. A campaign is divided into scenarios.

COMBAT

When it's time to fight, each player will roll+Movement for their characters. The order of turns will go from highest roll to lowest roll. If there are any ties, the rollers who have tied will reroll until that there is a clear higher roll.

A player's turn will consist of a motion action and a combat action.

MOTION ACTION

A motion action allows the player character to move anywhere within the area. They may also pick up an item or drop an item. If the character has any consumables, such as potions, they may also take those as their motion action.

If the character is next to an enemy, they must use their motion to step away from that enemy to shoot them. If the character is away from the enemy, they must use their motion action to get next to an enemy to melee attack them.

COMBAT ACTION

A combat action is where the character uses a skill on an enemy, an ally, or on themselves. This includes any class skill or basic skills.

OTHER COMBAT RULES

If the party has any allies, they will each take a turn after the player characters have gone. If there are multiple allies, then they will take their turn by consensus of the player group, with the GM being the arbiter in case of any disagreements.

Once all players have taken the turn for the round and any allies have taken their turn, the GM will then take a GM combat action. For example, they may summon more enemies into the area or introduce a new story element.

If you've noticed, the enemies don't take an individual turn. This is because in Terra Machina, an enemy will only attack the player characters if they roll a Minor Success or Fail on their combat action. If players roll constant successes, then their characters are just too good to be hit.

ENDING COMBAT

If an enemy's HP reaches 0, the enemy dies unless otherwise specified by the GM or scenario. Combat ends when all enemies have been killed.

Allies (non-player characters) that have their HP reduced to 0 are automatically killed.

If a player's HP reaches 0, they are not dead, but are knocked out. Regular healing items that only restore HP are ineffective. However, all status effects are immediately removed. On their turn, the player that has been knocked out will roll a Revive Roll where they will roll+Willpower to attempt to wake their character up.

Success	Roll a d8 and restore the character's HP by the result + 1
Minor Success	Restore the character's HP like a Success but take one of the following consequences: <ul style="list-style-type: none">➤ Reduce a basic skill by 1➤ Forget (uncheck) a class skill➤ Forget (erase) a custom skill
Fail	Lose 1 SP. If the character has 0 SP, then the character dies

If all characters are knocked out, then they are all killed, and the game is over. All players will need to create new characters.

If combat ends with the enemies being defeated and any of the characters are still knocked out, the other characters will have the opportunity to revive them using means available to them within the area such as skills or items. If the other characters do not have a way to revive the knocked-out character, then the knocked-out character will need to keep rolling Revive Rolls until they awaken or lose all their SP and die.

RECOVERY

To recover from low HP, low SP, or status effects without the use of an item or a skill, the characters may rest. They may attempt to do so if they are in a safe area and not adjacent to any dangerous areas. If the characters don't know if the adjacent areas are safe, then they may still attempt to rest anyways.

If the characters rest in a town, proper lodge, or home in which they are invited, then they recover all HP and SP, and all their status effects are removed.

If the characters rest in a safe area, but not in a proper location, they will restore half their max HP and max SP (rounded up). They will also only remove one status effect if they are affected by multiple.

LEVELING-UP

Every character starts at level 1. Every time the player rolls a Fail, they receive 1 XP. If a character is not in combat, they may spend 5 XP to level-up. If the character levels up, they will increase their level by 1 and increase how powerful they are by choosing only one of the following:

Roll a d4 and increase HP and max HP by the result up to a maximum of 50.
Roll a d4 and increase SP and max SP by the result up to a maximum of 50.
Add 1 to one of character's basic skills up to a maximum of 6 or the value of the related Stat.
Gain a skill from a Class Crystal sheet.
* Raise one stat by 1 and lower another stat by 1 up to a max of 10 and a minimum of 1.
** Acquire a new Class Crystal.

* If stat value is lowered, lower any basic skill that now exceeds the stat limit

** This option is only available if the character has mastered their current class crystals. The character is only allowed to have 3 active classes. If they wish to acquire a new class after their third, they must swap it out.

ELEMENTS

Earlier in the Basic Character Sheet section we discussed how armor and weapons can have elements associated with them. If a weapon has one or more associated elements, then any attack with that weapon uses that element in the attack. If the character's armor has an element associated with it then the attacks that the character are protected by that element.

Enemies can also have one or more elements associated with them. This means that all their attacks use those elements, and they are protected by those elements.

There are 8 elements in the game: Earth, Air, Fire, Ice, Water, Lightning, Holy, and Dark. Each element has an opposing element associated with it so there are 4 opposing element pairs. Earth opposes Air, Fire opposes Ice, Water opposes Lightning, and Holy opposes Dark.

The way this affects combat is as follows. If a character or enemy is protected by an element, if they receive an attack by that same element, the damage is reduced by 1. On the other hand, if they receive damage by the opposing element, then the damage is increased by 2.

For example, let's say you have a character with water armor and a fire sword in combat against an enemy that is of type water. If the character attacks the water enemy with the fire sword, the damage doesn't change because fire and water are not opposing elements. However, if the enemy counterattacks, that damage is reduced by 1 because the enemy's attack has water but so does the character's armor.

ENEMY TYPES

Enemies will have one or more types associated with them. This comes into play depending on certain skills a player's character may have. For example, using Diplomacy will only work on Human enemies. Whereas the player will have to roll+Tinker for Robotic enemies and roll+Aura with animal characters.

BOSSSES

A boss is the enemy at the end of the scenario. A boss should distinguish itself in that it should have a unique element that makes it different from regular enemies. Some example include:

- The Big Bad: A supremely powerful being that has double the characters' power.
- The Shielded Brain: The boss isn't that powerful but hides behind some mechanism that prevents them from being harmed. The player characters must find a way to disable their protection.
- The Mastermind: You could easily kill the boss, but what would that do? Their plan is already in effect. You must figure out what they've done and how to prevent the consequences that may occur.
- The Transformer: The battle is easy, but wait... It is transforming into some monstrous creature. It may do this 2 or 3 times.

ALLIES

At some points, the party may wish to recruit people to join them in their quest. This can include other people in the game, pets, tamed animals, etc. The ally should be played by the player whose character recruited them.

At the end of every scenario, the GM must challenge the player characters to keep an ally within the party. The controlling player will have their character roll+Diplomacy. On a Success, the ally will stay with the party. On a Minor Success, the ally will leave but may come back in the future. On a Fail, the ally leaves forever.

However, at any point, the GM may force the ally to leave if it is required for reasons of the story.

ASSIST

Whenever a character wishes to assist another character in what they're doing, they may roll to assist. What basic skill they roll is up to the GM based on how the player wishes their character to assist the other character who has the original roll. This must be decided before any rolls take place. With the following results:

- Success: The original roll by the character becomes an Epic Roll
- Minor Success: Nothing happens
- Fail: The original roll becomes a Tragic Roll

ASSISTING IN COMBAT

In combat, there is a turn order. To assist, the player does not need to wait for their turn, but if they choose to do so, their next turn is automatically skipped. They may only assist once per round of combat.

FILLING OUT THE BASIC CHARACTER SHEET

We will now go over how each player will fill out their Basic Character Sheet. We will go through each field and discuss how the player should.

NAME

This is where you will put down the name by which your character will be known. What's important here is the first name or nickname that the other characters will refer to this character as.

XP (EXPERIENCE POINTS)

This is the amount of experience the character has. This starts at 0 and will increase by 1 each time the character rolls a Fail. XP may be spent to level-up the character. This will be covered more in the Leveling-Up section.

LEVEL

This is the level where your character's skills are and starts at level 1.

STATS

Each character has 4 stats (Grace, Intellect, Might, Spirit) where the player will distribute the following values: 10, 7, 4, 1. This number represents the maximum number of points that a character can add to basic skills under that stat.

To start, all basic skills under the stats remain blank to indicate 0.

HP (HEALTH POINTS)

HP is how many hits your character can take before being knocked-out, which occurs when your HP hits 0. A character's HP is divided into HP (before the "of" on the character sheet) and max HP (after the "of" on the character sheet). To start, the character's current and max HP should be set to the value of the Might stat + 10.

SP (SPIRIT POINTS)

SP is the character's spiritual energy required to do certain skills. A character's SP and max SP should start at the value of the character's Grace stat + 10. A major difference between SP and HP is that the character does not get knocked out if their SP hits 0.

STATUS

There are 7 statuses that can be inflicted on the character. The way that statuses work are, before a character takes their turn in combat or moves to a new area outside of combat, they will roll against a basic skill. On a Success, they will be healed of the effect. On a Minor Success, they will still have the effect but are not affected at the time. On a Fail, they will be affected by status effect. The following is what happens for each status effect on a Fail:

Status	Basic Skill	Fail Effect
Bleed	Resilience	Reduce your character's HP by 1.
Blind	Resilience	In combat, your character's action will automatically miss if it requires sight. Outside of combat, Sense rolls will automatically fail.
Burn	Resilience	Reduce your character's SP by 1.
Mania	Willpower	Whether in or out of combat, your character will attack a random ally or self.
Numb	Willpower	Roll a Tragic Roll for all skill rolls.
Poison	Resilience	Roll a d4 then reduce your character's HP by that amount.
Scared	Willpower	Roll a d4 then reduce your character's SP by that amount.

MONEY

The currency unit in Terra Machina to purchase items is called bux. A player's character starts with 9 bux.

ARMOR

A character's armor is how much they reduce damage when they are attacked in combat. The rating is the amount of damage that needs to be subtracted from the enemy's attack roll. This can range from 0 to 2. Keep in mind that there are any weapons that have Piercing capability will ignore armor. The sum of your armor rating can never exceed 3.

The element(s) is what element(s) the character has when attacked. More information about elements later in this document.

WEAPON

A character's weapon is what the character uses to attack enemies. It also determines what die is rolled for damage. Weapons are divided into Melee and Ranged and, unless otherwise indicated, have the following hit dice.

Weapon	Damage Die
Unarmed, Gloves, Unspecialized	d4
Small 1-hand melee weapons (knives, daggers, hatchets)	d6
Large 1-hand melee weapons (swords, flails, machetes)	d8
2-hand melee weapons (staff, great sword)	d10
1-hand ranged weapons (handgun, short crossbow, javelins)	d6
2-hand ranged weapons (rifle, bow)	d8

Modifier is how much to add or subtract from the damage based on the individual weapon's attributes.

The element(s) is what element(s) the character's attack has. More information about elements can be found later in this document.

CHARACTER DESCRIPTION/SUMMARY

Here is where you will put your information about your character such as their appearance, history, and other aspects of the character that you feel is important.

ITEMS

This is where you will put any items that your character possesses and what they do. Your character will start with 1 potion.

CUSTOM SKILLS

This is where the player will note any custom skills their character has acquired throughout the game.

FILLING OUT THE ALLY SHEET

There is a separate ally sheet for any allies that become part of the party's adventure. It looks like the basic character sheet with some differences.

An ally does not have XP or Level associated with them. The only way the ally may improve is by possibly gaining custom skills.

An ally does not have starting stats. The stats are determined by the GM or scenario depending on how skilled the ally is.

An ally does not have Basic Skills. Instead, all rolls are done against the corresponding Stat. For example, instead of roll+Shoot for shooting a gun in combat, the ally will roll+Grace.

Most importantly, an ally does not have a class. Any extra skills they have will be entered in the Custom Skills section of the ally sheet.

CLASS CRYSTAL SHEET

Every character has an initial class crystal that they choose. Each class has unique characteristics to them. Here is where we will go over the different aspects of the classes.

DESCRIPTION

This field is a general description of the class to give the player a general understanding of the class.

WEAPONS

This field is the different types of weapons that the character can use. **Important Note:** if a character attempts to wield a weapon not in an active class it is considered unspecialized, which means the damage die is a d4.

STARTING WEAPON

The character will automatically have this weapon to use when the class is acquired.

CLASS PREREQUISITES

Only some classes will have this field. It means that the class cannot be chosen at the beginning and must be unlocked later after mastering the classes that are listed. Mastering a class is discussed under Class Mastery Skill section.

SKILLS

These are the skills that the character can acquire throughout the game. Each class automatically has a starting skill that the character can use upon acquiring the class. Obtaining a new class skill is an option for the player when their character levels up. However, they must choose one that is directly connected to a skill they already possess.

CLASS MASTERY SKILL

This skill can be obtained when the character levels up only if all other class skills have been obtained. This is the point when the character has mastered the class and is allowed to select a new class upon leveling up the next time. See Leveling-up section for more information.

GAME MASTER RESOURCES

Now that we've discussed the character sheets and the rules, the rest of this book is dedicated to assisting the GM create great scenarios for their players. The following aren't rules, per se, but will help make the GM's job much easier but, no matter what, you are the ruler of the world you create.

FOLLOW THE RULES... MAYBE?

Some players love the rules. They want you to play the game by the book. Some players trust the GM to be flexible to make the experience more fun. Terra Machina is geared more towards the latter. Some of the information is intentionally left vague for the GM to fill in. So, when something is vague, it's up to you to decide how to handle it.

LEVELS AREN'T THAT IMPORTANT

Though leveling-up gives a character more abilities by adding skills and improving basic skills, a level 1 character can travel with a level 10 or a level 50 character. Whenever a new player character is added to the party, it is recommended to start them at level 1 so the experience of the game changes them. However, it's perfectly fine to start them at a later level. As always, it's up to you, the GM.

CREATING WEAPONS

When designing unique weapons to dole out for players, you have several options to give them a set of unique attributes. Each basic weapon that the player automatically gets when they acquire or start with a class is worth the damage die number of sides. For example, if the weapon does d6 damage, then it is worth 6 bux. Any additional attributes as described below will add on to that base price.

Add +1 damage to the weapon	+10 bux
Add +2 damage to the weapon	+30 bux
Add element to a weapon	+3 bux
Cause a status effect	+12 bux

LIMITATIONS

Hypothetically, a player could do anything with a good enough roll. It's up to you to decide how much of a limit you allow the characters to have. You shouldn't allow a player to break the world or make the game less fun for others, but you also shouldn't deny them a chance to break your planned narrative if they see some sort of weakness in your design.

Another thing to note is that there is no maximum level, but at some point, leveling up will have little or no effect for a player character. This happens when a character has mastered all

classes (though they can only have three active). At that point, the GM should work with the player to retire that character and create a new one.

BUILDING A SCENARIO

THE UNBREAKABLE RULE

The most important rule about creating a scenario, is that you are not telling a story but, instead, building a playground for your players. The playground should provide danger, treasure, and plot points for your players to come across, but you never want your players to feel like they have little agency in the decisions that they can make.

START WITH A MAP

As stated earlier, the characters traverse the world in sets of areas. You should map out the different areas that are a part of the scenario and why they are important. You need to determine if the areas are safe or dangerous. If an area is dangerous, how can the players make it safe? More than likely, this will be the result of combat against enemies, but perhaps there are other solutions. Always reward creativity on behalf of the players. Other things an area may contain: secret treasure, traps, important NPCs.

CREATING ENEMY ENCOUNTERS

When designating an area as dangerous and placing enemies, you should have an idea of what kind or kinds of enemies are going to exist but be prepared to update to create a balanced encounter.

A balanced encounter is one where the enemy's power is close to the main party's power (within 10). An enemy's power is the sum of every enemy's HP + Armor + Highest Attack Die. The party's power is the sum of every player character and allies' HP + SP + Highest Attack Die.

However, it's up to you, the GM, to figure out if this formula applies to your own players. Different players may have different levels of skill when it comes to playing or may just desire less or more of a challenge.

SAMPLE CUSTOM SKILLS

The following is a list of examples to use as custom skills depending on the player:

Name	Description
Big Ears	Epic roll for Sense when listening to others' conversations
Brawler	Epic Roll for Melee when fighting one-on-one
Call of the Wild	Spend 1 SP to summon a Wolf to your side if in a forest. Wolf has 4 HP and can do 1d6 damage and has its own turn during combat.
Cavern Explorer	Epic Roll for Sense when inside a cave or cavern

Chef	Epic Roll for Tinker for creating a delicious meal that will restore 1d4 HP or SP
Detective	Epic Roll for Sense when investigating a crime
Good Shepherd	Epic Roll for when attempting to wrangle a plant-eating animal
Informed Traveller	Epic Roll for Knowledge roll for information about a city/town you haven't been to before
King Speech	Epic Roll for Diplomacy when speaking to rulers of nations
Mountain Climber	Epic Roll for Brawn for climbing mountains
Prosecutor	Epic Roll for Diplomacy when you try to convince others that someone is lying (whether it's true or not)
Forest Dweller	Epic Roll for Sense in a forest
Natural Athlete	Epic Roll for Brawn when competing in an athletic event
Entomologist	Epic Roll for Sense when searching for bugs
Tundra Explorer	Epic Roll for Sense when in cold climates
Executioner	Epic Roll for Melee when intending to kill an enemy
Bard	Epic Roll for Diplomacy when doing an acting or musical performance

ITEMS

Name	Description	Cost
Antidote	Immediately heals Poison	6
Aqua Grenade	A grenade that does 1d6 Water damage	6
Bandage	Immediately heals Bleed	6
Basic Airship	An airship with a capacity of 13. Not very good for combat.	700
Basic Armor	Adds +2 Armor	10
Basic Weapon	Basic type of any weapon (no modifiers)	5
Boat	A watercraft that carries 3 people and can cross still water	180

Brain Boost	Epic Roll for next Deduction Roll	15
Brawl Balm	Epic Roll for next Melee Roll	15
Calming Agent	Immediately heals Scared	6
Concentration	Epic Roll for next Shoot Roll	15
Concoction	Heals 10 SP	10
Concoction+	Heals 30 SP	25
Confidence Booster	Epic Roll for next Diplomacy Roll	15
Dangerous Mushroom	Requires a resilience roll: - Success: Heal 1d6 HP - Minor Success: Heal 1d6 HP but gain Poison - Fail: Gain Poison	5
Elbow Grease	Epic Roll for next Tinker Roll	15
Index Card	Epic Roll for next Knowledge Roll	15
Energy Boost	Epic Roll for next Aura Roll	15
Enhancer	Epic Roll for next Willpower Roll	15
Evil Grenade	A grenade that does 1d6 Dark damage	6
Eye Drop	Immediately heals Blind	6
Flame Grenade	A grenade that does 1d6 Fire damage	6
Flex	Epic Roll for next Movement Roll	15
Frost Grenade	A grenade that does 1d6 Ice damage	6
Helicopter	A flying craft that carries 4 people and can cross up to 8 areas before needing to land	270
Jerky	Restore 3 SP	3
Jetpack	Allows an individual to fly any distance outside of battle	210
Lazarus Tonic	Revives a fainted comrade in battle	100
Light Airship	A flying craft that carries 7 people and can cross long distances	330

Light Ship	A water craft that carries 11 people and can cross oceans	300
Lockpick	Picking a lock does not require a Tinker roll	10
Magnifier	Epic Roll for next Sense Roll	15
Medication	Immediately heals Mania	6
Medicine	Heals 2d10 HP, but can only be used outside of battle	7
Ointment	Immediately heals Burn	6
Potion	Heals 10 HP	10
Potion+	Heals 30 HP	25
Rock Grenade	A grenade that does 1d6 Earth damage	6
Saintly Grenade	A grenade that does 1d6 Holy damage	6
Scale Armor	Adds +2 Armor	10
Shock Grenade	A grenade that does 1d6 Lightning damage	6
Steroid	Epic Roll for next Brawn Roll	15
Stimulant	Immediately heals Numb	6
Tincture	Heals 1d10 HP and 1d10 SP	30
Tincture+	Heals all HP and SP	70
Vitamin	Epic Roll for next Resilience Roll	15
Welder's Gloves	Gloves that add +1 to Tinker Roll	22
Wind Grenade	A grenade that does 1d6 Air damage	6
Yacht	A water craft that carries 5 people and can cross oceans	260
Skinguard	Prevents Bleed twice before wearing off.	3
Eyeguard	Prevents Blind twice before wearing off.	3

Flameguard	Prevents Burn twice before wearing off.	3
Mindguard	Prevents Mania twice before wearing off.	3
Boneguard	Prevents Numb twice before wearing off.	3
Vaccine	Prevents Poison twice before wearing off.	3
Willguard	Prevents Scared twice before wearing off.	3

BESTIARY

Name:	Aquabug				
Description:	An	insect	that	lives	underwater
Power:	26				
HP:	15				
Armor:	3				
Def.	Element(s):		Air, Water		
Location(s)	Found:		Underwater		
Type(s):	Insect				
Attacks:					
Sting:	1d8+1 damage. Causes Poison.				

Name:	Arctic Sniper				
Description:	A white-coated person with a long-range rifle				
Power:	14				
HP:	4				
Armor:	0				
Def.	Element(s):		None		
Location(s)	Found:		Tundra		
Type(s):	Human				
Attacks:					
Shot:	1d10-1 Ice damage.				

Name:	Armored Jellyfish				
Description:	A	jellyfish	with	hard	armor
Power:	25				
HP:	14				
Armor:	7				
Def.	Element(s):		Holy		
Location(s)	Found:		Underwater		
Type(s):	Animal				
Attacks:					
Sting:	1d4 damage. Causes Burn.				

Name:	Armored	Rhino
Description:	A rhinoceros with a thick metal hide	
Power:		27
HP:		10
Aarmor:		5
Def.	Element(s):	None
Location(s)	Found:	Plains

Attacks:		
Charge:	1d12	damage
Ground Stomp: 1d8 damage to 2 enemies		

Name:		Baterina
Description:	A giant bat with legs that wears a tutu	
Power:		18
HP:		6
Aarmor:		0
Def.	Element(s):	None
Location(s)	Found:	Cave
Type(s):		Monster
Attacks:		
Bite: 1d12 damage. Causes Mania		

Name:	Blue	Dragon
Description:	A wingless dragon that can breathe underwater	
Power:		33
HP:		20
Aarmor:		3
Def.	Element(s):	Water, Ice
Location(s)	Found:	Underwater, Shore
Type(s):		Reptilian
Attacks:		
Swipe:		1d6
Water Blast: 1d10-1 Water damage.		

Name:	Bog		Bugs
Description:	Groups of bugs that live in the swamps		
Power:			19
HP:			11
Armor:			0
Def.	Element(s):	Water,	Dark
Location(s)	Found:	Swamp	
Type(s):	Mob,	Insect	
Attacks:			
Scare Bite: 1d8-1 Dark damage. Causes Scared.			

Name:	Bog		Knight
Description:	An armored figure wielding an axe that hangs out in swamps		
Power:			20
HP:			10
Armor:			2
Def.	Element(s):	Dark	
Location(s)	Found:	Swamp	
Type(s):	Human		
Attacks:			
Axe Attack: 1d8 damage			

Name:			Boogeyman
Description:	A	scary	undead creature.
Power:			10
HP:			4
Armor:			0
Def.	Element(s):	Air	
Location(s)	Found:	City	
Type(s):	Undead		
Attacks:			
Scare Strike: 1d6 damage. Causes Scared.			

Name:	Brown			Dragon
Description:	Dragons the size of human beings with thick brown scales			
Power:	20			
HP:	10			
Armor:	2			
Def.	Element(s):			Earth
Location(s)	Found:	Sky,	Cave,	Mountain
Type(s):	Animal,			Reptilian
Attacks:				
Scratch:	1d8+3			damage
Bite: 1d8 damage. Will latch onto a character causing the following: -1 to Movement Rolls and automatic 1d4 damage until free				
Dirt Tail Whip: 1d6 ranged Earth damage plus causes Blind.				

Name:	Butter			Fry
Description:	An	electrified	giant	butterfly.
Power:	27			
HP:	15			
Armor:	2			
Def.	Element(s):			Air, Fire
Location(s)	Found:	Sky,	Mountain	
Type(s):				Insect
Attacks:				
Wind	Blast:	1d10	Air	damage
Fire Blast: 1d10 Fire damage				

Name:				Candlestick
Description:	A	sentient		candlestick
Power:				19
HP:				5
Armor:				2
Def.		Element(s):		Fire
Location(s)	Found:	Desert,		City
Type(s):				Monster
Attacks:				
Bonk:	1d12	+	3	damage.
Burn: 1d4 Fire damage to all enemies.				
Name:		Cave		Driller
Description:	A robotic tank with a drill that can dig in the earth.			
Power:				22
HP:				9
Armor:				3
Def.		Element(s):		Earth
Location(s)	Found:	Cave,		Mountain
Type(s):				Robotic
Attacks:				
Drill:		1d6+3		damage.
Sound Blast: 1d10-1 damage. Causes Mania.				

Name:	Cave	Tortoise`
Description:	A brown tortoise with spikes on its back	
Power:		19
HP:		3
Aarmor:		4
Def.	Element(s):	Earth
Location(s)	Found:	Cave, Mountain
Type(s):	Animal,	Reptilian
Attacks:		
Bite:	1d12	Earth damage.
Spike Shot: 1d6+1 Earth damage to all enemies. Causes Bleed.		

Name:	Cave	Troll
Description:	A troll that lives in a cave.	
Power:		22
HP:		11
Aarmor:		3
Def.	Element(s):	Earth
Location(s)	Found:	Cave
Type(s):		Monster
Attacks:		
Smash:	1d8+5	damage.
Frightening Stance: Causes Scared.		

Name:	Clay	Pidgeon
Description:	A pidgeon made of clay.	
Power:		16
HP:		8
Aarmor:		2
Def.	Element(s):	Earth, Air
Location(s)	Found:	Sky, Plains
Type(s):		Animal
Attacks:		
Birdstrike: 1d6 damage. Causes Scared.		

Name:	Crystal	Ninja
Description:	A crystalline person with martial arts skills	
Power:		21
HP:		8
A armor:		3
Def.	Element(s):	Holy
Location(s)	Found: Swamp, Shore,	City
Type(s):		Human
Attacks:		
Sharp Punch: 1d10-1 damage. Causes Bleed.		
Name:	Crystal	Squid
Description:	A squid that can swim	
Power:		24
HP:		13
A armor:		1
Def.	Element(s):	Water
Location(s)	Found: Underwater,	Shore
Type(s):		Animal
Attacks:		
Snap: 1d10 damage to a single player		
Embrace: 1d4 damage. Traps the player who must make a move to escape		
Water Jet: 1d10 damage to all players		

Name:	Dark	Wolf
Description:	A tall wolf with charcoal-like skin	
Power:		19
HP:		9
Armor:		0
Def.	Element(s):	Dark
Location(s)	Found:	Cave, Forest
Type(s):		Animal
Attacks:		
Bite:	1d10 damage	

Name:	Desert	Rhino
Description:	A yellow rhino that inhabits the desert	
Power:		26
HP:		16
Armor:		2
Def.	Element(s):	Earth
Location(s)	Found:	Desert
Type(s):		Animal
Attacks:		
Trample:	1d8+1 damage to all enemies.	
Glare:	1d6+1 dark damage.	

Name:	Devil	Snake
Description:	A giant snake with a pair of horns	
Power:		26
HP:		21
Armor:		1
Def.	Element(s):	Water, Dark
Location(s)	Found:	Underwater, Swamp
Type(s):		Reptilian
Attacks:		
Snakebite:	1d4 Piercing damage. Causes Poison.	

Name:	Dryad		
Description:	A humanoid guardian of the forest with a treelike body.		
Power:	18		
HP:	10		
Armor:	2		
Def.	Element(s):	Holy	
Location(s)	Found:	Forest	
Type(s):	Monster		
Attacks:			
Smack: 1d6 damage.			

Name:	Eagle Flock		
Description:	A	Eagle group	of eagles
Power:	20		
HP:	8		
Armor:	0		
Def.	Element(s):	Air	
Location(s)	Found:	Sky, Forest, Mountain, Plains, Desert	
Type(s):	Animal,	Mob	
Attacks:			
Manic Screech:	A	screech that causes	Mania.
Peck: 1d12-1 damage.			

Name:	Electric Eel		
Description:	An underwater creature that shoots electricity		
Power:	19		
HP:	9		
Armor:	0		
Def.	Element(s):	None	
Location(s)	Found:	Underwater	
Type(s):	Animal		
Attacks:			
Bite:	1d10	damage	
Shock: 1d8 Lightning damage to all enemies. Causes Numb.			

Name:	Experiment
Description:	A person that has been experimented on and no longer looks human. Arms have been replaced with guns
Power:	17
HP:	9
Armor:	0
Def.	Element(s): None
Location(s)	Found: Swamp, Cave, City
